OLAWOORE USAMAH ABIDEMI

FULL-STACK DEVELOPER — (CODE AND NO CODE DEVELOPER)

+234 911 745 0722 | olawooreusamahabidemi@gmail.com | Nigeria (Remote-Ready) | linkedin.com/in/usamah-abidemi

PROFESSIONAL SUMMARY

Full-Stack Developer with 2+ years hands-on experience building and deploying scalable web applications using modern JavaScript technologies across both frontend and backend. Skilled in designing RESTful APIs, implementing secure authentication systems, and developing responsive, production-ready user interfaces with smooth, interactive animations using Tailwind CSS, GSAP, Framer Motion, and Lenis. Experienced with MongoDB, MySQL, Node.js, Express, and React, with practical knowledge of Docker, Git-based workflows, and API testing tools. Comfortable structuring backend architecture, optimizing database queries, and translating UI/UX designs into clean, maintainable frontend components. Self-driven, detail-oriented, and focused on writing clean, efficient code that delivers measurable user and business value.

WORK EXPERIENCE

Full-Stack Projects

ILI-Nigeria — Multilingual Services Platform ***Translation & Interpretation Marketplace | 2025***

- Built and deployed a multilingual service platform connecting users to professional translators across 200+ languages, featuring a responsive React frontend with dynamic language switching.
- Engineered backend architecture using Node.js, Express, and MongoDB, integrating Firebase Authentication, Cloudinary media storage, and WebSocket-based real-time communication.

Zula — WhatsApp-Based E-Commerce Platform ***Commerce Platform with Messaging Checkout | 2026***

- Designed and launched a full-stack e-commerce web platform with product catalog, filtering, and cart management using React.
- Developed backend services using FastAPI (Python) and MongoDB with JWT authentication, integrating WebSockets, Brevo email automation, Cloudinary media storage, and WhatsApp-based checkout workflows.

Dynamic Empire — Service & Product Booking Platform ***Vendor Booking & Commerce Platform | 2026***

- Built a specialized booking and commerce platform for jewelry vendors, cake makers, and ceremonial service providers with a responsive React interface and dynamic category navigation.
- Developed FastAPI backend with MongoDB supporting vendor onboarding, booking management, WhatsApp checkout workflows, and real-time updates via WebSockets.

SSCF — Solace Sickle Cell Foundation Website ***Fullstackt Contract | 2026***

- Designed and developed a modern foundation website using React and Framer Motion with interactive UI components and responsive design.
- Implemented structured content sections showcasing programs, warrior support resources, and downloadable educational materials.

BBHSOBA Quiz Platform ***Collaborative Education Project***

- Contributed to the development of an online student quiz and performance tracking platform using React and REST APIs.
- Implemented secure authentication, role-based dashboards for teachers/admins, and interactive exam interface with scoring logic.

Frontend Projects

FundedU — Mobile App Landing Platform ***Product Landing & Marketing Website | 2025***

- Developed a high-performance landing platform using Next.js with Tailwind CSS, GSAP, and Framer Motion, delivering animation-driven UI storytelling and interactive user experience.

- Optimized performance through server-side rendering, component-level code splitting, and SEO-optimized layout architecture.

Backend Engineering Projects

E-Attendance — University Platform ***Geospatial & AI Attendance System | 2025 – Present***

- Engineered backend services for a university attendance system integrating geofencing and OpenCV-based face recognition to prevent proxy attendance.

- Built REST APIs using Python (FastAPI) and MongoDB with JWT authentication, implementing spatial validation logic and optimized queries for reliable performance under concurrent usage.

Kommunity — Community Management Platform ***Multi-Tenant Activity & Land Management System | 2025 – Present***

- Developed backend architecture for a multi-tenant community platform managing activity coordination, land ownership, and tenancy workflows.

- Designed scalable Node.js/Express REST APIs with MongoDB, implementing JWT authentication, RBAC authorization, and optimized database operations for consistent API performance.

CMS / WordPress Development
Business Website Development (WordPress CMS)

- Designed and deployed responsive business websites using WordPress CMS with Elementor, optimized for performance, SEO, and accessibility.
- Managed plugin configuration, contact forms, security hardening, caching optimization, and deployment on shared/VPS hosting infrastructure.

Software Engineer Intern

Solace IT Ltd **Ogun State | 2023 - 2025**

- Assisted in backend development using Node.js, Express, and MongoDB, building CRUD service modules and authentication workflows for internal systems.

- Supported frontend improvements, debugging, deployment preparation on Linux hosting environments, and maintained version control workflows using Git.

Personal Projects

BookSync — Book Discovery Platform ***Vue.js, Google Books API, REST Integration***

- Developed a Pinterest-inspired book discovery web application using Vue.js with component-based architecture and responsive UI design for curated content exploration.
- Integrated Google Books API for real-time search, metadata retrieval, and dynamic rendering with structured filtering to enhance user discovery and browsing experience.

ListenWise — AI Research-to-Audio Platform ***Python, FastAPI, LLM Integration, Text-to-Speech APIs, React***

- Built an AI-driven research platform that generates structured topic reports using LLM pipelines with automated summarization and content generation workflows.
- Engineered FastAPI backend and React frontend enabling research input, preview, and downloadable audio reports via integrated text-to-speech APIs.

Jobsy — Student Service Marketplace ***FastAPI, JWT Authentication, React, MongoDB***

- Designed a campus-focused service marketplace with FastAPI backend supporting JWT authentication, role management, and RESTful service request workflows.

- Developed responsive React frontend with dynamic dashboards, service listings, and structured search for student-to-student marketplace interactions.

EverBot — WhatsApp Reminder Automation Bot ***Python, FastAPI, WhatsApp Cloud API***

- Developed a WhatsApp-based task automation bot enabling users to schedule reminders through conversational messaging.

- Integrated WhatsApp Cloud API with FastAPI backend to handle webhook events, scheduling logic, and automated time-based notification execution.

TECHNICAL SKILLS

Primary Languages: Python, JavaScript (ES6+), TypeScript, C++, HTML, CSS

Backend & Frameworks: Django REST Framework, FastAPI, Node.js, Express.js, NestJS, REST APIs, GraphQL, Microservices

Frontend & UI/UX: React.js, Vue.js, Next.js, Vue.js, Tailwind CSS, Redux, Vite, animation libraries (GSAP, Framer Motion, Lenis)

Databases: PostgreSQL, MySQL, MongoDB, SQLite

Security & Authentication: JWT, OAuth2, Rate Limiting, RBAC, Request Validation, Secure API Design

Real-Time & Messaging: WebSockets, Socket.IO, Redis Pub/Sub

Payments & Communications: Paystack, Twilio (SMS), SendGrid, Push Notifications

Tools & Collaboration: Git, GitHub, Figma, Postman, Firebase

SOFT SKILLS

Independent Remote Work & Self-Direction • Project Ownership & Accountability • Technical Leadership & Code Standards • Clear Communication & Documentation • Analytical & Data-Driven Problem Solving • Cross-Functional Collaboration • Adaptability & Rapid Skill Acquisition • Mentorship & Knowledge Sharing • Resilience Under Pressure • End-to-End System Thinking

COMMUNITY & EXTRACURRICULAR

- Startup-Driven Builder — Active contributor to Nigerian developer communities, open-source projects, and student tech hackathons.
- Team Mentor — Coached peers in Python, backend architecture, Django, AI integration, and full-stack development across multiple engineering cohorts.

EDUCATION

Bachelor of Science (B.Sc.) in Computer Science (In View)
2024 – 2027
Tai Solarin Federal University of Education, Ijagun

AWARDS & ACHIEVEMENTS

- 1st Place — EdTech COE TASUED Hackathon v2 (2025)
  Built *E-Attendance*, a geofenced university attendance platform integrating face recognition (OpenCV), FastAPI backend, MongoDB, and secure JWT authentication to prevent proxy attendance and improve institutional tracking accuracy.

- 4th Place — EdTech COE TASUED Hackathon v1 (2024)
  Developed *VisionAI*, an AI-powered virtual classroom platform built with React and Node.js, featuring interactive learning modules and structured content delivery.
